

Manufacturing Laboratory

Prosthetic Solutions, Inc. boasts a manufacturing lab that is over 2000 square feet. This is where the magic happens! With our ovens, laminating stations, chemical and plaster rooms, we are able to make your prosthesis in a timely manner. Our lab is located adjacent to our Hollister Office and deliveries to and from the office are made daily. We have a plaster and repair room with full machinery located in our Santa Clara office as well. The combination of the lab spaces in Hollister and Santa Clara allow us to best treat and care for our patients.
